PROJECTS

Form Bot React, NodeJS, Express, MongoDB   Live!

- Designed and developed FormBot, an interactive chatbot-based form builder using the MERN stack.
- Implemented dynamic form creation and real-time data collection with customizable themes
- Integrated real-time analytics to visualize responses, completion rates, and user insights.
- Delivered a seamless, responsive user experience for form sharing and data export.

My Notes App JavaScript , React   Live!

- Developed and launched "My Notes App," a responsive and intuitive note-taking app built using React.js.
- Integrated local storage functionality to provide users with persistent data storage, ensuring that their notes are always accessible across sessions
- Implemented a great user experience across various devices through responsive design principles.
- Improved note organization by incorporating date and time information, allowing users to easily track the timeline of their notes.
